

ExploreTerra

Unearth Your Energy Potential

Training

PERSONALIZED SKILLS DEVELOPMENT

Participants will acquire advanced skills in several key areas of professional and academic development.

The content is designed to improve competency in research, writing, project management and communication.

ExploreTerra

Unearth Your Energy Potential

WELCOME!

These services are designed to provide advanced training in research, academic writing, project management and communication.

Participants will learn how to design and execute research, write proposals and scientific articles, manage projects and evaluate their impact.

In addition, techniques for organizing conferences, writing abstracts and sessions, and improving audience interaction will be covered.

SCOPE

- **Duration:** Hourly Rates Apply
- **Price per student:**
\$25-\$40 per hour
- **Target Audience:** Young professionals, students, and public in general STEM and social sciences fields.
- **Format:** Personalized sessions will allow us to approach one or several topics, working with the research that each person brings to the session. You don't need any previous experience.
- **Type or training:** Remote.
- **Maximum number of students:** Individual sessions, one person per session.
- **Languages:** Available in English or Spanish

SERVICES

Research & Project Consultations

1. Research design and methodology
2. Research Proposal Sessions
3. Methodology Strategies
4. Research Significance
5. Writing and editing (theses, essays, scientific and academic papers, and proposals)
6. Problem-Solving
7. Risk Management
8. Quality Assurance
9. Project Monitoring & Evaluation
10. Project Execution

Conference Consultations

1. Abstract Writing and Editing
2. Session Writing and Editing
3. Chairing a Session
4. Audience Engagement
5. Poster/presentation Guidance

Tailored Engagement Proposals or Initiatives

- Science Education & Training Programs
- Diversity & Inclusion Engaging and Advisory
- Career Consultations
- Communications Strategy
- Development and Outreach
- Mentorship

SERVICES

Career Consultations

- What is next? (coaching for undergrads)
- What is next? (coaching for graduate students)
- Scholarship/Fellowship Applications
- Academic Mentorship 1 on 1
- Industry Mentorship 1 on 1

ExploreTerra

Unearth Your Energy Potential

ABOUT COMPANY

ExploreTerra's vision is to contribute to the geoscience consultancy and training landscape. Our core purpose is to establish a dynamic platform that creates connections between available talent and opportunities or needs within the energy industry.

We are dedicated to enriching the energy sector through specialized services and empowering geoscientists with technical training, tailored technology transfer, and the adoption of integrated, multidisciplinary best practices.

NUESTROS INSTRUCTORES

Ana Vasquez, PhD

Chief Scientific Officer

Ana C. Vasquez, PhD, is a marine and policy scientist with over 15 years' experience in climate change mitigation and resilience.

Ana held a doctorate in marine sciences and a MA in international law. Ana is member of several international scientific associations, including WOS, ASLO, OceanExpert, GeoLatinas, EAG, DOSI, AGU.

Sergio Villamarin

Educator, Statistician, and Coder

Sergio Villamarin is a multidisciplinary scientist with a strong passion for education, outreach, and science communication. He currently graduated from an MS program in mathematics, an MS in Environmental science, and a certificate program for river and coastal sciences from Tulane University.

Sergio worked for over 8 years in different outreach programs, directing pedagogical research groups, creating science communication material for conferences, mentoring students, and organizing K-12 STEM workshops for teachers and students.

GET IN TOUCH

Our training programs, designed by seasoned geoscientists, are tailored to meet contemporary industry needs.

We prioritize technical and core skill enhancement and the incorporation of advanced technologies, equipping professionals for the dynamic field of geoscience.
